

Infocache Introduces Foreign Languages Translation Services

MADISON AVENUE, NEW YORK – August 17, 2010: Expanding on its data services domain expertise, [Infocache Corporation](#) has introduced [foreign language coding and translation](#) services. In an increasingly global business environment the number of languages and the volume of documents in foreign languages have grown substantially. Responding to the evolving need Infocache is expanding its translation and coding services to include Hebrew, Japanese, Chinese, Russian and more. Understanding foreign language nuances in defining fine lines and terms of contracts, marketing and public relations materials has become an important part for all industry sectors.

By launching translation services, Infocache has expanded its business scope to provide premium data services and unparalleled value to clients. In addition to translation, Infocache offers [web extraction and mining](#), transactions processing, [electronic document discovery](#), [electronic medical records management](#), [media content generation](#) and word processing and transcription. Primarily a legal process outsourcing (LPO) firm, Infocache began with legal solutions, [litigation support](#) and records management services. Infocache utilizes state-of-the-art technology and highly-skilled computer professionals to provide premium data services. The company offers web-based as well as [offshore litigation content coding](#) with the capacity of 500,000 images every week.

Recently, Infocache was recognized as one of the top 20 LPO companies by the 2010 edition of the Black Book of Outsourcing, a widely-recognized objective survey source of the global outsourcing services industry. [Infocache Corporation](#) was ranked fifth among a total of 4,839 outsourcing companies based on a survey conducted in 2009.

Infocache prides itself on its insight, quality, performance, client satisfaction and competitive price structure. Combining the onshore advantage with its offshore presence, the company has been able to provide premium quality along with fast turnaround time at competitive ratings.
