**NEWS RELEASE**

**January 17, 2011**

**MerlinOne and Infocache Establish Agreement**

**NEW YORK – January 12, 2011:** [MerlinOne](http://www.merlinone.com) and [Infocache Corporation](http://www.infocachecorp.com) announce that Infocache will begin to market Merlin Legal 2.0 services as part of their comprehensive litigation services. MerlinOne, which has provided digital asset management solutions for two decades, has released its Merlin Legal 2.0 SaaS (Software-as-a-Service) which allows lawyers, paralegals and litigation support professionals to process, review, analyze and produce, all in a single, easy-to-navigate web-based e-Discovery system. Infocache is a New York based litigation support company serving law firms since 1999.

The web browser interface of Merlin Legal 2.0 includes advanced features, which let users de-dupe an entire case in seconds, view emails by threads, and redact or reunite within the system. Users can word search millions of documents, audio, or video files in under a second. This comprehensive service is offered at predictable flat rate monthly pricing that usually saves 40-90%. And new iPad integration lets users access their ESI from anywhere.

Guli Rajani, CEO of Infocache, said, “We were very happy to see the new features and functionality in the 2.0 version. It now provides a platform for processing, analysis, review and production we will enthusiastically introduce to potential customers.”

David Tenenbaum, CEO of MerlinOne, said, “We are glad to have been selected by Infocache, a long time leader in the New York legal market, and look forward to bringing responsive, capable support to their customer base. Please come see for yourself how Merlin works on an iPad at booth 1507 at LegalTech.”

**About Infocache – Infocache Corporation** is a New York-based data management services company providing customized litigation support and data services to the legal, healthcare, new media, and educational sectors.
